

Saint Jean Industries COBAWHEELS™

COBAWHEELS™ are 9.5 x 20" aluminum wheels developed by combining COBAPRESS™, a patented manufacturing process comprised of casting and hot forging, and Friction Stir Welding (FSW), which preserves the metallurgic quality of welded areas. This process results in aluminum wheels that are 3 lbs lighter than those created by forging, with fewer manufacturing steps and less material needed.

Category:
Module

Application:
2018 Dodge Charger SRT Hellcat

Weight Savings:
13%
Lighter than forged design

Methodology:
Manufacturing Process
